Minecraft ocean animals mod 1.12.2

OceanCraft Mod seems to be an interesting mod by adding life in the oceans and make the ocean biomes much better in you Minecraft world. Download this mod and you will enjoy 10 brand new mobs for the ocean and around. The oceans might have never been the strong suit and power point in Minecraft, but the OceanCraft Mod 1.10.2 wants to remove all the hassle and problems, instead it wants to offer a fresh and new perspective towards the entire experience. What the Ocean Craft does is that it helps you get a very good experience and at the same time it offers an ocean world that is great looking, refined and with a great potential to begin with. Minecraft Forge 1.16.4 This mod is definitely interesting for those that found the ocean life and look stale. Until this point, there wasn't a specific great thing about the oceans in Minecraft and honestly that is really unfortunate. Thankfully, all of that changes with the OceanCraft Mod Minecraft because this does deliver a great insight into the ocean life, with the mod offering a wide range of animals to begin with. From fish to turtles and so on, there are quite a lot of animals that you can check out here and all of them look simply stunning. Some of the animals can be found deep underwater and that can be both scary and exciting at the same time, that's for sure. Of course, the cool thing about the mod is that it always manages to impress and it does bring in front a true set of great experiences. The variety of this mod and the great look that it has does allow you to boost your experience and take it to new heights. If you do go underwater you won't be able to stay there long but the mod does offer you a great way to enjoy your time while you are there. The world you can find at that location is visually impressive, the experience of visiting the depths is stunning and as a whole there's just a ton of cool value here. It's maybe the most interesting and fun way to discover the depths of the ocean. For someone that loves the ocean, the mod is definitely a no brainer, but aside from animals it also adds plants as well so even those that want more plants in the game will be happy. You will find the mod as being a great mix of visuals and a stellar way to boost the way the ocean looks and feels. It's a tad different than the original and in a very good way for sure. Contents: Mobs [spoiler] Cannibals spawns in pillar huts at the beach Seagulls spawns in almost every cold/normal biome Crabs spawns at the beach Kingcrabs spawns at the beach and stonebeach Fish spawns in ocean rivers and deep ocean Mantarays spawns in ocean rivers and deep ocean Orca's spawns in ocean deep ocean Seaturtles spawns in ocean and deep ocean Sharks spawns in ocean and deep ocean Whales spawns in ocean and deep ocean Anglerfish spawns in deep ocean at the bottom [spoiler] Block's [spoiler] [spoiler] Items & Armor [spoiler] [spoiler] World Generations [spoiler] Pillar Hut a tropical hut from the cannibals spawns in beach this is the inside of the hut, a spawner with a chest Shells these colorful shells spawns in beach biome Quicksand quicksand spawns on beach too!
