Success requires various skills, including the ability to know and use a variety of tools and techniques to generate and organize information and ideas. Rewriving and summarizing your notes is also an effective way to really learn information you may have lost. Share the PIN IT Tweet Share an e-mail A key to success in biology is having good skills to take notes. It is so surprised that many different models of notes available for download as bookmark for critical reading, notes of clusters, cork notes, hierarchical notes and so on. In addition, talk directly to the instructor and ask for feedback on your notes. If you know what you will be discussed in advance, you will be better prepared to take notes. Some instructors provide guidelines for courses or lessons. Reviewing your notes is also advantageous when preparing for a biology laboratory. The reorganization of the notes has two purposes. If it highlights each sentence, it will be difficult for you to identify the specific points you have to focus on. It allows you to rewrite your notes in a format It helps you understand them more clearly and helps you to review the material you wrote. I refer to the tools and techniques This page as a "notesmaking" because "preparation notes" is passive: just as we must give a meaning, so we have to take notes "in our head, on the page and in our notebooks. When you take notes, make sure you have enough space in so that you can decipher that you wrote. Most of the instructor say no, you will have to practice taking notes quickly. In this case, ask the instructor for the permission to record the lesson. When highlighting, make sure to highlight only specific phrases or words. Some airlines have specific operational variations. Below are some good biology withdrawal advice that will surely help you learn to take the notes of biology. Use the stars or underlining to emphasize the important information in your notes.
